LOZANO

Essential oil producer

Distilling nature

SINCE 1960

www.esenciaslozano.com

Rooted in nature. Since 1960.

In our early years, we were pioneers in cultivating various wild aromatic plants native to Spain, such as lavender, Spanish sage, thymol thyme and Spanish rosemary.

Esencias Martínez Lozano began cultivating lavender in Campo de San Juan, Moratalla, in the north-west of the Region of Murcia, contributing to the development and well-being of the whole area. As a result, numerous small-scale producers of aromatic plants emerged, many of whom are still in business today.

900+ hectares. Own plantations.

Our own aromatic crops link each harvest to its place of origin. Lavender, lavandin, rosemary, Spanish sage, thyme and rockrose, amongst others, are all part of the landscape.

Essential oils

- Ambrette seeds oil — *Abelmoschus moschatus*
- Aniseed spanish — *Pimpinella anisum*
- Cade — *Juniperus oxycedrus*
- Cistus-Rockrose — *Cistus ladanifer*
- Coriander — *Coriandrum sativum*
- Cypress — *Cupressus sempervirens*
- Eucalyptus globulus — *Eucalyptus globulus*
- Fennel bitter — *Foeniculum vulgare*
- Fennel sweet — *Foeniculum vulgare*
- Helichrysum italicum — *Helichrysum italicum*
- Hyssop officinalis — *Hyssopus officinalis*
- Spike lavender — *Lavandula latifolia*
- Lavandin abrial — *Lavandula hybrida*
- Lavandin grosso — *Lavandula hybrida*
- Lavandin super — *Lavandula hybrida*
- Lavender — *Lavandula angustifolia*
- Lavender fine — *Lavandula angustifolia*
- Lemon — *Citrus limon*
- Lemon petitgrain — *Citrus limon*

Organic

Hydrolates

We trade hydrolates - floral waters from the essential oils that we produce.

Aromatic herb harvest.

We grow and harvest our own aromatic plants in south-eastern Spain to produce our pure, natural essential oils.

Distilled at origin.

Our facilities are equipped with industrial steam-distillation units, designed to distil aromatic plants immediately after harvesting, thereby preserving their characteristic aromatic profile and properties.

Internal analytical control.

Quality control is carried out in our in-house laboratory. Each batch undergoes testing, which helps to ensure consistent quality and full traceability.

5.500m² warehouse.

Our warehouse and its temperature-controlled storage areas preserve the products in optimal conditions, ensuring year-round availability and a reliable supply to customers worldwide.

Our certifications and affiliations.

We operate in accordance with recognized standards that support the traceability, safety and quality of our raw materials, strengthening our customers' confidence in every pure and natural essential oil we produce and select.
